

SCHOOL OF PUBLIC HEALTH
POLICY ON COMPUTERS USED AT HOME

University-owned computers

Any computer purchased with funds from any School account, including consulting accounts, is owned by the University.

Computers belonging to the School but used at home should be brought into the School for set-up, support or repair.

Privately-owned computers

The School has no responsibility to set up, support or repair privately purchased computers at staff members' homes.

NOTE: According to Risk Management Office policy, staff wishing to use their own private computer at work should obtain a letter from the Head of School giving them permission to do so, for insurance purposes.
